

UAT Execution & Report Submission

Import Data using Transform Maps

Date	01 October 2026	Team ID	SWTID-2026-7959
Project Name	Import Data using Transform Maps	Maximum Marks	4 Marks

1. Purpose of Document

This document describes the test coverage and open issues of the *Import Data using Transform Maps* project at the time of release to User Acceptance Testing (UAT). Testing covered the following stages of the workflow:

Stage	Focus of Testing
Import	Importing source data through an Import Set.
Mapping	Mapping source fields to target fields using a Transform Map.
Deduplication	Handling duplicate records using Coalesce.
Validation	Validating data, including reference fields.
Verification	Verifying the resulting records in the target table.

2. Defect Analysis

The table below shows the defects identified during UAT and their current resolution status, grouped by severity (Severity 1 is the most critical).

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	1	0	1
Duplicate	0	0	1	0	1
External	0	0	0	0	0
Fixed	0	1	2	1	4
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	1	4	1	6

Of the 6 defects logged, 4 were fixed, 1 was by design and 1 was a duplicate. No Severity 1 defects were raised.

3. Test Case Analysis

The table below shows the number of test cases that passed, failed and remain untested for each major functional area of the Transform Map import process.

Section	Total Cases	Not Tested	Fail	Pass	Pass Rate
Source Data / Import Set	5	0	0	5	100%
Transform Map Configuration	5	0	0	5	100%
Field Mapping & Coalesce	4	0	0	4	100%
Data Validation	4	0	1	3	75%
Reference Field Handling	3	0	0	3	100%
Target Record Verification	4	0	0	4	100%
Error / Exception Handling	3	0	0	3	100%
Security / Access Control	2	0	0	2	100%
Total	30	0	1	29	96.7%

UAT Summary: The Transform Map workflow was tested across source data loading, field mapping, duplicate handling, validation, reference fields, target verification, exception handling and access control. Most planned test cases passed; **one Data Validation case requires correction before final acceptance.**

4. Exception Reporting

Exception / Issue	Status	Action
Invalid or missing source field	OPEN	Validate source data before transformation.
Duplicate record detected by Coalesce	RESOLVED	Verify Coalesce field mapping.
Reference field mismatch	RESOLVED	Verify referenced user/department value.
Transformation error	RESOLVED	Review transform log and mapping.

5. Final Report Output

The final UAT output confirms that the *Import Data using Transform Maps* process can accept source data, load it into an Import Set, transform and map the records into the target table, apply duplicate handling through Coalesce, and verify the resulting records.

Metric	Result	Metric	Result
Total UAT Test Cases	30	Not Tested	0
Passed	29	Open Issues	1
Failed	1	Pass Rate (29 / 30)	96.7%

6. Version Control

Version	Date	Description
1.0	01 October 2026	Initial UAT report for Import Data using Transform Maps.
